

100 VIBE EDITING PROMPTS

Copy, paste, change the details. Each one works with the Vibe Editing Skills Pack.

■ GETTING STARTED (1-10)

1. Let's make a video with the Vibe Editing System. Run the setup check and fix anything missing.
2. Show me the menu of video types I can make and ask me what I have (footage, logo, voice).
3. Create a new 9:16 project called my-first-reel and show me the test frames.
4. Explain each step to me in one sentence as you go. I'm learning.
5. Give me a contact sheet of raw/take1.mp4 so I can see what's in it.
6. What's the best video I could make from the files in raw/? Give me 3 ideas.
7. Set up my brand: colours #101820 and #FF6B00, fonts Poppins and Inter. Save it to brand.json.
8. Download the fonts in my brand and show me a test frame with each.
9. Log every change we make in work/revisions.md.
10. Save this project's style as a template so the next video is a one-liner.

■ TALKING-HEAD (11-25)

11. Make a 30-second reel from raw/take1.mp4. Cut pauses and ums, pop captions, upbeat music.
12. Transcribe raw/take1.mp4. Spell my name (Priya Sharma) and brand (Ideabro) correctly.
13. Read the transcript and suggest the strongest hook line. Don't render yet.
14. Move my hook to the front and remove the retake between 12 and 15 seconds.
15. Use a snappy pace for Reels. Use a natural pace for the YouTube version.
16. Add punch-in zooms on every other cut, centred on my face.
17. Pop captions in my brand colours. Highlight "free", "secret" and "10x".
18. Move captions up so they don't cover my mouth, and make them one size smaller.
19. Add a lower-third with my name and title for the first 3 seconds.
20. Pop a 🔥 sticker when I say "money" and a ✅ when I say "done".
21. Find the 5 best 30-60 second clips in this podcast and give me a table with hook lines.
22. Reframe this 16:9 podcast to vertical, following whoever is speaking.
23. Make a YouTube edit: natural pace, chapters from the transcript, clean subtitles.
24. Put my face cam in a round bubble bottom-right of the screen recording.
25. Make 3 hook variations of this reel for A/B testing.

■ LAUNCH VIDEOS & ADS (26-40)

26. 25-second launch reel for my course "Vibe Editing". Bold and punchy, end card ENROLL NOW.
27. Draft a beat table using Hook → Problem → Reveal → Proof → CTA. Don't render yet.
28. Give me 5 hook options with on-screen text and visuals.
29. Open with a typed prompt "make it pop" and the screen exploding into the finished video.
30. Three benefit chips that pop on the beat: CUTS, CAPTIONS, MUSIC.
31. A counter racing up to 12,500+ students with an impact on the final number.

32. Cut out raw/product.jpg, float it with a soft shadow and a slow push-in.

33. Add a price card: "€999 today only", lime pill, pops in with a sparkle.

100 VIBE EDITING PROMPTS

34. Rebuild my app's home screen as clean vector UI inside a phone and animate a tap.

35. Render this ad in 9:16, 4:5, 1:1 and 16:9.

36. Make a 15-second cut-down and a 6-second bumper from this ad.

37. Event teaser for my webinar on 12 Oct, 7 PM, with speaker cards and "Save your seat".

38. A 10-second countdown on beats, ending with my logo and an impact.

39. Testimonial compilation: 3 face clips and 3 quote cards in brand style.

40. Make it feel more premium: slower moves, more space, serif titles.

■ MOTION GRAPHICS (41-55)

41. Before animating, show me a key still of each section to approve the look.

42. A 20-second showreel with 4 sections: kinetic type, shapes, data, logo outro.

43. Kinetic typography for my voiceover: each word slams in exactly when I say it.

44. A 5-second logo reveal: assemble from 3 shapes, impact on the downbeat, sparkle, tagline types in.

45. An animated bar chart of these numbers: Jan 120, Feb 180, Mar 260. Label the units.

46. A line chart that draws on, with a counter showing the final value.

47. 5 transparent lower-thirds in my brand, 4 seconds each, plus a preview sheet.

48. A seamless 8-second looping background in my brand colours.

49. A before/after split-screen wipe with a slider.

50. An animated quote post (1:1) for "Direct the vibe. Let AI do the keyframes."

51. An explainer for "how vibe editing works" in 45 seconds with icons built on the words.

52. Use snappy motion: ease-out expo 0.35 s in, 0.2 s out, hard cuts on bars.

53. Add a whip-pan transition between scenes 2 and 3 with a whoosh.

54. Add subtle film grain and a vignette to the whole piece.

55. Make a liquid gradient background with a shader look.

■ STYLISTED ANIMATION (56-65)

56. A 20-second claymation short: a sheep discovers vibe editing at 2 AM. Wordless, playful music.

57. Crayon-style explainer: each object sketches on, then colours in, one per sentence.

58. Paper-cut promo with torn-paper wipes and layered parallax.

59. A whiteboard doodle explainer with a marker drawing each idea.

60. Give my mascot eyes that blink naturally and look at whatever is moving.

61. Make my mascot talk along with work/vo.wav.

62. Add squash and stretch when the character lands, with a boing on each landing.

63. A kids' story in 30 seconds, narrated with a warm voice, big readable words.

64. Animate on twos with a subtle boil so it feels handmade.

65. End card: "by Ideabro Studio" in hand-drawn letters, held for 2 seconds.

■ VFX (66-75)

66. Replace my background with a soft blur (portrait mode).

67. Put the word VIBE in huge letters behind me, appearing when I say "vibe".

68. Split this shot into 3 layers (background, me, text) and show an exploded 3D view.

69. Make me disappear into particles when I say "remove me" and come back on "bring me back".

70. Stick my logo to my palm and make it spin in 3D.

71. Make it cinematic: letterbox, teal-orange grade, slow push-in, serif titles.

72. Slow motion on the walk-in at 0:03, smooth optical flow.

73. Split screen: me on the left, the screen recording on the right.

74. Add a lime glow outline around me on the beat drop.

75. I say my edit directions out loud in this take. Build each effect on its word.

■ AI FOOTAGE (76-85)

76. Scan every clip in raw/ and tell me which are usable, with exact ranges.

77. List the AI artifacts you found (hands, text, morphs) and how you'll avoid them.

78. Cut a 60-second brand film to my voiceover, one shot per sentence.

79. Replace the garbled text on the laptop screen with a real UI graphic.

80. Grade everything with the same clean-bright look and subtle grain.

81. Give me 5 regeneration prompts for the shots that were unusable.

82. Make it feel real: add ambience, foley-like SFX and a cinematic bed.

83. Turn my script into a 60-second faceless Short with AI voice and pop captions.

84. Make a documentary-style piece: slow push-ins on photos, serif lower-thirds.

85. Build a one-command pipeline so my next faceless episode is: write script, run.

■ AUDIO (86-93)

86. Make a 30-second hype music bed at 128 BPM.

87. Give me 3 variations of a chill bed so I can pick.

88. Clean up the voice: remove hiss and harsh S sounds.

89. Turn work/script.txt into a Hindi voiceover with a warm female voice.

90. Duck the music under my voice and master to -14 LUFS.

91. Make a square audiogram for my podcast clip with a waveform and karaoke captions.

92. A music visualiser with bars around my logo that pulse on the bass.

93. Re-cut this montage so every cut lands on the beat.

■ BULK (94-100)

94. A personalised welcome video for every row in students.csv using first_name.

95. Test the first 3 rows before rendering the rest.

96. Make sure the longest names still fit. Show me stills of the worst case.

97. Render the same video in English and Hindi with matching captions.

98. 30 daily quote videos from quotes.csv in my brand template.

99. An ad matrix: 3 hooks × 2 CTAs × 2 formats, named clearly, with a report.

100. Export everything for Reels, Shorts and YouTube and give me a delivery folder.
