

MOTION & EASING CHEAT SHEET

■ PICK THE EASING BY INTENT

INTENT	EASING	DURATION
arrive (UI, text)	ease-out cubic / expo	0.3–0.5 s
playful arrive	ease-out back / spring	0.4–0.6 s
leave	ease-in cubic	0.2–0.35 s
move across	ease-in-out	0.5–0.9 s
land / drop	bounce	0.6–0.9 s
constant drift	linear (only here!)	—

■ TIMING RULES

- Exits are faster than entrances.
- Stagger groups by 60–120 ms.
- Anticipation: a small move back before a big move forward.
- Hold important frames ≥ 1 s (reading time = 0.3 s/word + 0.5 s).
- Entrances on beats, big changes on bars.
- One focal point moving at a time.

■ KINETIC TYPE MOVES

word slam · stagger rise · highlight bar · typewriter + caret · counter · strike-through · slot machine · masked reveal

■ TRANSITIONS

hard cut on beat · whip pan · iris/circle wipe · shape wipe · zoom-through · glitch · match cut

■ CAMERA

slow push-in (+3–6% over a shot) · handheld drift (tiny noise) · impact shake (decays in 0.4 s)

■ COMMON MISTAKES

everything the same speed · linear motion · too many fonts/colours · text touching the frame edge · no hold time

DIRECT THE VIBE. LET AI DO THE KEYFRAMES.
