

TROUBLESHOOTING GUIDE

PROBLEM	ASK CLAUDE / DO THIS
<code>python3</code> not found (Windows)	"use py instead of python3"
"externally managed environment"	"set up a virtual environment and re-run the doctor"
ffmpeg not found	"run the doctor with --install" (it installs a bundled ffmpeg)
skills not showing in <code>/skills</code>	check the path: <code>~/ .claude/skills/vibe-talking-head/SKILL.md</code>
first run very slow	normal: AI models download once
transcription misspells names	"re-transcribe with these names: ..." or fix the transcript
captions in the wrong font	"download the brand fonts and re-burn captions"
captions out of sync	"use the re-timed words file from the cut, not the raw one"
phone video sideways	"fix the rotation of raw/take1.mp4"
clicks at cuts	"add short audio fades at every cut"
music too loud	"music 4 dB quieter and duck more under my voice"
render too slow	"render a draft" / "render only 0:10-0:15"
out of memory	"process this shot in parts"
video won't play on phone	always deliver files from the export step
text looks blurry	render at final size; never upscale a draft
cut-out edges rough	"use the high-quality matte model" and better lighting next time

■ STILL STUCK?
