

GLOSSARY A-Z

TERM	MEANING
Alpha / transparency	an invisible background so graphics can sit on top of other video
Anchor	the point a crop or zoom keeps centred (usually the face)
Aspect ratio	frame shape: 9:16 vertical, 16:9 horizontal, 1:1 square, 4:5 portrait
B-roll	supporting footage shown over the main speaker
Bar	4 beats of music; the natural place for cuts
Beat table	a time-by-time plan of picture, sound and text
Boil	the gentle wobble of hand-drawn/clay outlines between drawings
BPM	beats per minute (music tempo)
Brief	the written plan: goal, audience, platform, vibe, brand
Clean plate	the background with the person removed
Contact sheet	a grid of frames used to review a video at a glance
CTA	call to action: what you want the viewer to do
Cut-down	a shorter version of an edit (15 s, 6 s)
Ducking	lowering music automatically while someone speaks
Ease-out	fast start, gentle stop: the default for things arriving
Easing	how motion speeds up/slows down (ease-out, back, bounce...)
EDL	edit decision list: which parts of the source are kept, in what order
ffmpeg	the engine that cuts, encodes and exports video
FPS	frames per second (24 cinematic, 30 social, 60 smooth)
Forced alignment	matching each word of a transcript to its exact time
Grade	the colour look of a video
Hook	the first 1–3 seconds that stop the scroll
Jump cut	a cut within the same shot (removing a pause)
Ken Burns	a slow pan/zoom over a still photo
Kinetic typography	animated text as the main visual
Letterbox	black bars top and bottom for a cinematic look
Lower-third	a name/title graphic in the lower part of the frame

TERM	MEANING
DIRECT THE VIBE. LET AI DO THE KEYFRAMES.	
LUFS	loudness unit; social platforms target about -14 LUFS
LUT	a file that applies a colour look
Matte	a black-and-white mask showing where the subject is
On twos	holding each drawing for 2 frames for a handmade feel
Optical flow	creating in-between frames for smooth slow motion
Punch-in	a zoom on a jump cut to add energy
Render	turning the edit into a finished video file
Safe zone	the area where platform buttons won't cover your text
SFX	sound effects
Skill	a ready-made playbook + tools Claude uses for a type of task
.srt	a subtitle file uploaded alongside a video
Stills	single check frames rendered before the full video
Style frame	a still that defines the look of a section before animating
Template	a reusable project you fill with new text/data
Transcript	the text of everything said, with timestamps
TTS	text-to-speech (AI voiceover)
Vibe Loop	Brief → Beat table → Build → Stills → Draft → Final → Export
