

QUICK START: INSTALL IN 15 MINUTES

Everything you need to make your first AI-edited video today. Mac and Windows.

■ WHAT YOU NEED

ITEM	WHY	WHERE
Claude Code	the AI editor	code.claude.com (desktop app, terminal or VS Code)
Python 3.10+	runs the editing tools	python.org/downloads
Vibe Editing Skills Pack	the playbooks + toolkit	Course Resources → R02
~3 GB free disk	AI models download once	—

■ STEP BY STEP

1. **Install Python.** Windows: tick **"Add Python to PATH"** on the first screen.
2. **Install Claude Code** and sign in.
3. **Install the Skills Pack.** Unzip `vibe-editing-system-all.zip` so each `vibe-...` folder sits in: - Mac / Linux: `~/.claude/skills/` - Windows: `%USERPROFILE%\.claude\skills\`
4. **Restart Claude Code** and type `/skills`. You should see 9 skills starting with `vibe-`.
5. **Make a new empty folder**, open Claude Code in it and say:

Let's make a video with the Vibe Editing System. Run the setup check.

6. Claude installs what's missing (ffmpeg included) and shows **branded test frames**.  You're ready.

■ IF SOMETHING GOES WRONG

YOU SEE	DO THIS
<code>python3</code> not found (Windows)	say "use py instead of python3"
"externally managed environment"	say "set up a virtual environment and re-run the doctor"
skills don't show in <code>/skills</code>	check the folder path: <code>skills/vibe-talking-head/SKILL.md</code>
slow first run	normal: models download once

■ YOUR FIRST PROMPT

Make a 30-second Instagram reel from raw/take1.mp4. Cut the pauses and ums, add big pop captions, upbeat music, and export for Reels.

DIRECT THE VIBE. LET AI DO THE KEYFRAMES.
